

A NEW GENERATION PLANT GROWTH PROMOTER FOR TEA

# Zaidi 0.025% E.C.

Increasing **Tea** production the natural way

Zaidi is a new generation plant growth promoter for tea. Zaidi contains **Brassinolides**, which are natural substances with plant growth promoting activities. They trigger vital physiological processes in plants leading to enhanced growth, development and crop yields.

*Zaidi ensures*

- *Early 'bud break' in pruned bushes*
- *Increased rate of photosynthesis and partitioning of assimilates*
- *Increased leaf area and number of pluckable shoots per unit area*
- *Reduction in 'banjhi' buds*
- *Enhanced productivity without deterioration in quality*
- *Imparts drought tolerance under moisture stress*

Zaidi is non-toxic, biodegradable, environmentally friendly and ecologically safe.

Zaidi requires only three applications at monthly intervals commencing just before the dry spells / during periods of water stress at 100 ml per hectare or 40ml per acre. Zaidi's active ingredients are in readily absorbable form making it effective as a foliar spray.

READ THE LABEL CAREFULLY BEFORE USING
