Our Story

Having grown up with natural, herbal remedies like *neem* and *tulsi*, the Founder and owner, Aasit Shah aspired to create impact by encouraging use of natural, organic products in farming, whether its food, flowers, or medicine.

Organix Limited was established in Nairobi, Kenya over two decades ago and has been at the forefront in providing regenerative and sustainable agriculture and floriculture solutions derived from mainly plant and natural origins.

A vast range of Organix products are certified for organic farming with globally reputed Ecocert.

Since 2021, the company has been a member of 1% for the Planet global network. This commitment drives impact via donations with like minded partners like Miti Alliance, Sadhana Forest and Fifuture who are involved in green initiatives.

Since 2022, the company also had the opportunity to support and uplift the lives of the Dabasso Community in Kilifi by marketing their neem oil and neem cake products.

Ecocert Certification strives to enable production processes that respect the environment, better management of available energy and of natural resources (water, air, soil fertility) socially responsible sectors, and better product quality and safety.

1% for the Planet represents a global network of businesses, individuals and environmental partners tackling our planet's most pressing environmental issues.

Our Promise

We are committed to delivering safe, natural, biodegradable and nontoxic inputs for farming.

Our Vision

We aim to become the preferred supplier of safe, natural and sustainable product solutions for our clients in the agriculture sector in Kenya.

Our Mission

We become the preferred supplier by offering the right solutions for water conservation, nutrient efficiency, restoring soil fertility, enhancing root systems and safe pest control.

Our Values

Safety
Integrity
Reliability
Responsible

Our approach and solutions are targeted at ensuring that we create and sustain natural environments safely.

As a result, over the years Organix has invested in research and development of thoroughly tested solutions that are both compliant and proven for commercial applications.

What We Do

We believe in the power of Mother Nature to nourish and sustain healthy plants on her own.

Our range of safe, natural, biodegradable and nontoxic inputs help recreate forest like conditions making plants thrive.

Whether you're a home gardener planting forest, food and fruit trees, or a small/large scale commercial farmer, or are simply in need of quality landscaping and lawn care services, our experienced team has solutions for you.

All our solutions are:

- Biodegradeable
 - Environmental friendly
 - Non-Toxic
 - Ecologically Safe
 - Zero Residue
- Additionally, they:
- Have Low Pre-Harvest Intervals
 - Can be used on wide range of crops without harming beneficial organisms

Several products in our portfolio are certified for organic farming.

Organix Limited
nurturing life safely

Our Solutions

Our safe, non-toxic and biodegradable solutions support in increasing crop yields by increasing aeration, improving nutrient availability, encouraging beneficial micro-organism activity and ultimately in managing costs by reducing watering frequency.

Organix Product Benefits:

Water Conservation and Nutrient Use Efficiency

Organix solutions not only reduce irrigation rate by 50% but also help with better utilisation of nutrients by helping reduce leaching and lessen nitrate pollution of groundwater.

Restoring Soil Fertility

Our natural plant extract solutions are excellent for restoring soil health as they help build beneficial microorganisms and assist in the selective suppression of non-beneficial pests and diseases.

Enhance Root Systems

Organix range of natural growth products are highly effective in reducing transplanting shock as well as for the reestablishment and maintenance of a healthy root system.

Safe Pest Control

The Neem-based, and other botanical solutions are shown to be effective in the selective suppression of insect, disease and soil borne pests.

FOOD SAFETY FIRST -

Crops like Tomatoes are vulnerable to a number of pests. As a result, pesticides are commonly applied to tomato in Kenya.

Organix range of products can be used on their own or integrated with other safe, synthetic inputs as and when required for optimum results making them ideal for Integrated Crop Management (ICM) and resistance management strategy.

Product Solutions - Water & Nutrient Efficiency

WATER RETAINER FOR LONG DURATION CROPS

- Reduces** water frequency for irrigated crops
- Reduces** leaching of nutrients due to heavy rain or overhead irrigation
- Aerates** soils while expanding and contracting while absorbing and releasing water leading to greater root mass
- Increases** crop yields

WATER RETAINER FOR SHORT DURATION CROPS

- Reduces** watering frequency for irrigated crops
- Reduces** leaching of nutrients due to heavy rain or overhead irrigation
- Aerates** soils while expanding and contracting while absorbing and releasing water leading to greater root mass
- Increases** crop yields

Product Solutions - Soil Fertility & Nutrient Efficiency

ORGANIC SOIL CONDITIONER

Certified for Organic Farming
Builds soil structure and water holding capacity
Increases aeration
Improves nutrient availability

EARTHLEE[®]

ORGANIC HUMATE POWDER

Inexpensive natural alternative to animal manures and avoids weeds
Natural chelating agent and frees locked nutrients
Increases transfer of nutrients from soil to plants
Encourages beneficial micro-organism activity
Inexpensive way of converting granular fertilizer to slow release by coating with Earthlee

Product Solutions - Enhanced Root Systems

nhance

ORGANIC SEA WEED EXTRACT

nhance

ORGANIC SEED TREATMENT

ORGANIC SEA WEED EXTRACT

Certified for organic farming
Reduces transplanting shock
and enhances root development
Increases crop yields

ORGANIC SEED TREATMENT

Certified for organic farming
Enhances early plant growth
and **uniform germination**
Easy to apply
Increases crop yields

PLANT GROWTH IN HARMONY WITH NATURE

Helping farmers grow since 1978
Kelpak Liquid Seaweed Concentrate
has been helping farmers improve their crop output
for four decades.
Scientific trials prove that Kelpak delivers consistent
and significant benefits to the farmer.

Kelpak is a global leader
in seaweed products for over forty years.

Product Solutions

ACHOOK

NEEM BASED NEMATICIDE/INSECTICIDE

Certified for Organic Farming
Effective against nematodes and insects
Does not kill beneficial insects like BEES
Very low pre-harvest interval of 8 hours
Ideal for integrated Pest Management (IPM) Systems

ZAIDI®

NATURAL PLANT GROWTH REGULATOR

Certified for organic farming
Increases drought tolerance
Increased rate of photosynthesis and number of pluckable shoots
Reduces 'banji buds' and **encourages early bud breaks** in pruned bushes of Tea

Botanicals

Turmeric extract for stress resistance

Natural plant supplement with amino acids and iron

Cinnamon extract to improve plant growth

Garlic extracts, natural sulphur compounds for immunity

Botanical extract to stimulate plant enzymes

Natural chlorophyll A & B essential for photosynthesis

Marigold extract for healthy roots

Citrus extract useful for relieving plant stress

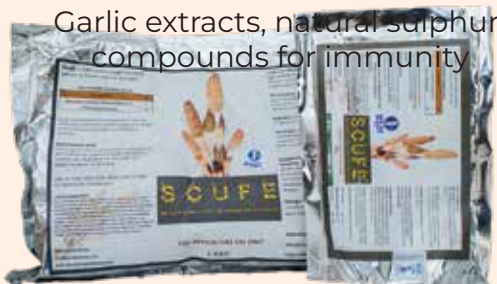

Botanical suspension for rooting

Black pepper extracts with macro and micronutrients for plant function

Natural saponification agent derived from soapnut (*Areetha*)

Garlic extracts, natural sulphur compounds for immunity

Horsetail extract for healthy plants

Botanical extract with organic nitrogen for healthy growth

Essentials Potting Soil with organic oil cakes and minerals

Our Services

Landscaping & Garden Maintenance

Kitchen Herb & Vegetable Gardens

Potting for Plants & Tree Nurseries

**Tree Planting Support
Tree Crops & Indigenous Fruit Treea**

Our Clients

Valued clients include Floriculture & Horticulture farms, Coffee & Tea farms, Corporate Institutions, Nature Conservancies, Non-Governmental Organizations and Environmental Impact Organizations.

LANDSCAPING

Our Partners

I started using Organix products in our landscaping and garden maintenance about 10 years ago. However, with the intensification & importance of our climate, water resource challenges over the past few years, we have endeavored to use their products in most of our work. This includes the Organix pest control range as well as their extensive organic soil conditioners & fertilizers. The services provided by Organix are beyond superior from field advice to supply and delivery.

MRS COLLEEN STREET
Natural Lifestyle

Having used your products for years now, we can attest to their effectiveness. You have totally filled the gap in organic inputs, as a great supporter of organic farming for small scale farmers.

MR PETER WANGARA
Limbua Group Limited

I have known Aasit and Organix for more than 2 decades. He is a pioneer in introducing products that support organic farming. At the time we were not able to understand the philosophy but as we learnt more about regenerative farming we realised that Aasit and his company were ahead of time. I am personally indebted to Aasit for his persistence in pushing organic solutions to us in our mind.

MR AVINASH MOKATE
Sunfloritech Naivasha
(Part of BlackTulip Group)

Organix focuses on making organic inputs accessible to farmers who are increasingly turning to organic farming markets while training them with the knowledge and skills they need in managing costs, pest and disease incidence.

SUCCESSFUL RESULTS

50% increase in tomato growth and yield after consistent application of Organix Absorber

Greener foliage and fuller maize cobs as a result of consistent application of Organix Earthlee

SUCCESSFUL RESULTS

nhance, Earthlee and Absorber treated roses showing larger leaves, healthier foliage with more green and red shoots

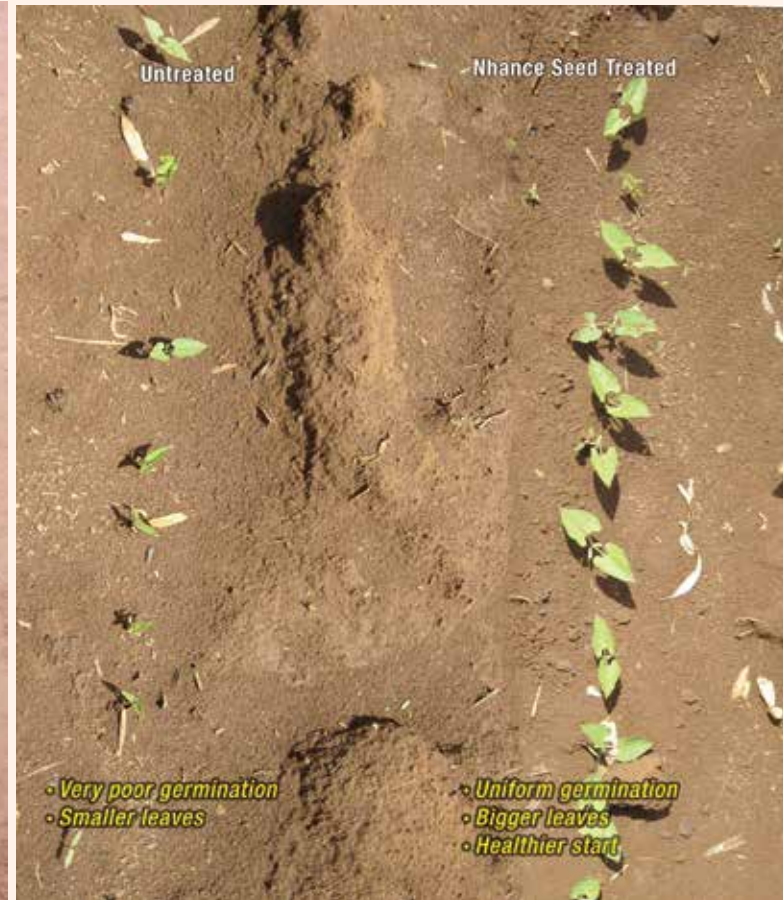

nhance treated tea leaves at a leading tea farm showing greater root mass, bigger leaves and healthier start overall

Pumice media treated with Absorber, Earthlee and nhance showing more feeder roots, better top growth with more branching & foliage

Shrub shoots showing a stronger, deeper root system with new and healthier foliage emerging earlier after consistent treatment with Absorber & nhance.

nhance treated bean seeds showing uniform germination, bigger leaves and healthier start

SUCCESSFUL RESULTS

nhance treated Macademia trees showing greater greater growth and healthier trees overall

Kelpak boosts Avo growth and Yield

Trials show various benefits of using Kelpak on avocados including improved nursery growth, fruit set and retention as well as better fruit quality and higher yields.

Kelpak increases Total Marketable Potato Yield

Field trials conducted in South Africa and Europe clearly show the many benefits of applying Kelpak Liquid Seaweed Extract to potatoes, including drought resistance, higher nutrient uptake and marketable yield.

Onions, Macadamia,
Roses** and other crops.

1% FOR THE PLANET

Global Network, Local Impact

1% for the Planet is a global network with thousands of businesses and environmental organizations working together to support people and the planet.

As a member of the network, Organix Ltd committedly donates at least 1% of annual sales directly to environmental organizations like Sadhana Forest and Miti Alliance in Kenya.

Sadhana Forest

Focuses on sustainable living, food security through ecological transformation, wasteland reclamation, and veganism. The aim of Sadhana Forest Kenya is to promote food security by establishing food forests together with the Samburu people.

Zero greenwashing.
100% accountability.

1% for the Planet members commit to donating at least 1% of annual sales directly to environmental organizations. Every donation is certified to ensure businesses meet that commitment.

Miti Alliance

A registered social enterprise in Kenya focused on Environmental Education through empowering and equipping the current and next generation on tree growing, conservation and sustainability.

The Miti Schools Program focuses on empowering and equipping school-going children with knowledge, skills and understanding of climate change issues with a bias to planting and growing trees, specifically fruit and indigenous trees.

Organix Ltd's partnership with Miti Alliance is focused on regenerative and sustainable agriculture, as well as planting trees.
